User Acceptance Tests

1) Teacher should be able to create a quiz in a course for students to answer:

   Given a teacher with access to the quiz creation feature

   When the teacher selects a course to create a quiz

   Then the teacher should be able to:

   - Add questions to the quiz

   - Set the correct answers for each question

   - Save and publish the quiz for students to access

2) Students should be able to review an answered quiz, along with their grade:

   Given a completed quiz by a student

   When the student accesses the "Quiz History" section

   Then the student should be able to:

   - Select the quiz from the history

   - View the answers they provided for each question

   - See the grade or score received for the quiz

3) Teacher should be able to view all the grades of all the students who answered a quiz which was created:

   Given a completed quiz by multiple students

   When the teacher accesses the "Gradebook" or "Quiz Results" section

   Then the teacher should be able to:

   - Select the specific quiz

   - View the grades or scores of all the students who answered the quiz

4) Students should be able to view and answer all the quizzes created by the teacher in a course:

   Given a student is enrolled in a course

When the student accesses the "Quizzes" section

Then the student should be able to:

- View a list of all quizzes available for the course

- Select and open a specific quiz to answer the questions

- Submit their answers for the quiz

5) Student's quiz should be able to be autograded by the system:

Given a completed quiz by a student

When the student submits the quiz

Then the system should be able to:

- Automatically grade the quiz

- Accurately evaluate the answers based on the correct answers set by the teacher

- Assign the appropriate score or grade to the student's quiz

6) Teacher should be able to answer student's questions on the course:

Given a teacher with access to the Q&A or Discussion forum for the course

When the teacher views the questions posted by students

Then the teacher should be able to:

- Provide answers or responses to the student's questions

- Ensure that the teacher's answers are correctly displayed and accessible to the students

7) Student must be able to send course feedback to review a course he/she has enrolled into:

Given a student enrolled in a course

When the student accesses the "Course Feedback" or "Reviews" section

Then the student should be able to:

- Select the course for which they want to provide feedback

- Compose and submit their feedback or review for the course

8) Teacher should be able to view all the course feedback from the students on how the course is reviewed:

        Given feedback or reviews submitted by multiple students for a course

        When the teacher accesses the "Course Feedback" section

        Then the teacher should be able to:

        - View a list of all the feedback or reviews received for the course

        - Read the detailed feedback provided by each student

9) Students should be able to ask questions on the course on the Q&A forum:

        Given a student enrolled in a course

        When the student accesses the Q&A or Discussion forum for the course

        Then the student should be able to:

        - Create a new question thread
